

## 9.11 Practice - Graphs of Quadratics

Find the vertex and intercepts of the following quadratics. Use this information to graph the quadratic.

1)  $y = x^2 - 2x - 8$

2)  $y = x^2 - 2x - 3$

3)  $y = 2x^2 - 12x + 10$

4)  $y = 2x^2 - 12x + 16$

5)  $y = -2x^2 + 12x - 18$

6)  $y = -2x^2 + 12x - 10$

7)  $y = -3x^2 + 24x - 45$

8)  $y = -3x^2 + 12x - 9$

9)  $y = -x^2 + 4x + 5$

10)  $y = -x^2 + 4x - 3$

11)  $y = -x^2 + 6x - 5$

12)  $y = -2x^2 + 16x - 30$

13)  $y = -2x^2 + 16x - 24$

14)  $y = 2x^2 + 4x - 6$

15)  $y = 3x^2 + 12x + 9$

16)  $y = 5x^2 + 30x + 45$

17)  $y = 5x^2 - 40x + 75$

18)  $y = 5x^2 + 20x + 15$

19)  $y = -5x^2 - 60x - 175$

20)  $y = -5x^2 + 20x - 15$
